

The Educational Aim of the Department

Our department's purpose is to produce the engineers who can be active in a wide range of the fields, such as electricity, electronics, and information - communication technology, while mastering not only the knowledge of electrical and electronic engineering, but also the ability to flexibly adapt to an computer and information - communication fields. Our department helps our students think scientifically, design skillfully and practice cooperatively. The Students are trained to have essential knowledge and creative engineering skills in the fields of electrical energy, electronics, information - communication technology, control systems, computer science, and related technologies.

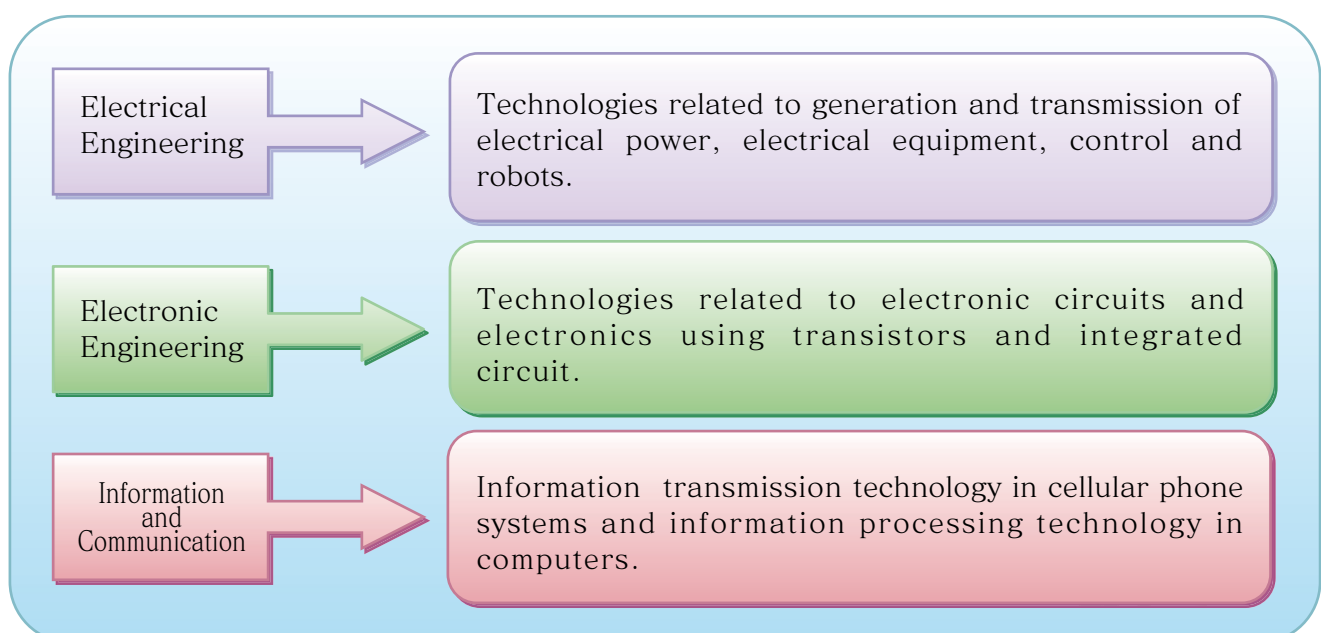

▲ Engineering Experiments

▲ Robots Created by Students

▲ Presentation of Graduate Research Project

▲ Main Fields of Study in the Department of Electrical and Electronic Engineering
