

Advanced Course

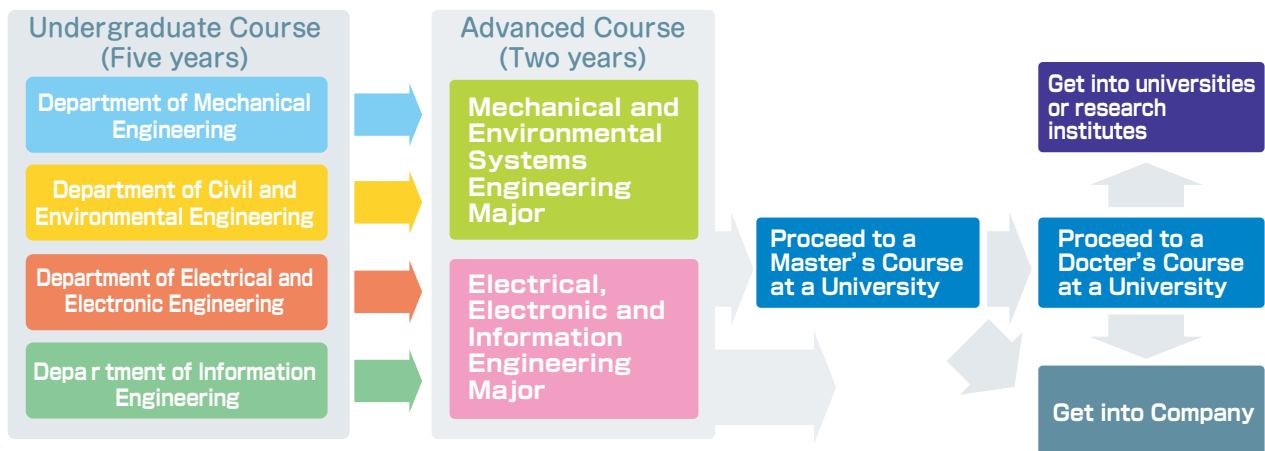

Overview

Oita National College of Technology set up an advanced course in 2003 to further train graduate students to make greater contributions to industrial progress. The two-year course program is built upon the five-year undergraduate curriculum. The course program was accredited in 2006 by the Japan Accreditation Board for Engineering Education (JABEE) for its international level of education.

The Advanced Course consists of two majors: the Mechanical and Environmental Systems Engineering Major, and the Electrical, Electronic and Information Engineering Major. The prescribed admission capacity for each major is 8 students.

A student who has earned all the credits required for course completion and has been successfully evaluated by the National Institution for Academic Degrees and University Evaluation (NIAD-UE) is awarded a Bachelor's degree. After that they are considered to be equivalent having passed the First-Step Professional Engineer Examination conducted by the Institution of Professional Engineers, Japan (IPEJ).

Numbers of Advanced Course Students

As of May 1, 2012

Capacity and number of students	Admission capacity	Enrollment Capacity	Present number of students		
			1st Year	2nd Year	Total
			Major		
Mechanical and Environmental Systems Engineering	8	16	12	11	23
Electrical, Electronic and Information Engineering	8	16	11	8	19
Total	16	32	23	19	42
